**Growth of industries**

1035. SHRI INDRADEEP SINHA:
SHRI SURAJ PRASAD:

Will the Minister of INDUSTRY be pleased to state:

(a) whether it is a fact that the growth of industry in 1985-86 has slowed down;

(b) what was the growth rate of industry in 1983-84 and 1984-85;

(c) what are the reasons for the slow growth; and

(d) what steps are being taken to achieve the target of the growth?

THE MINISTER OF STATE IN THE DEPARTMENT OF INDUSTRIAL DEVELOPMENT (SHRI M. ARUNACHALAM): (a) to (d) According to the provisional index of industrial production upto January 1986 and the quick index for February 1986 released by CSO, rate of growth of industrial production during the first 11 months of 1985-86 was 6.0 per cent as compared to 6.7 per cent achieved during the corresponding period of 1984-85. The manufacturing sector, however, showed a growth of 5.9 per cent during April-February, 1985-86 as against 5.6 per cent during April-February, 1984-85. The rates of growth of industrial production during 1983-84 and 1984-85 were 6.1 per cent and 6.8 per cent respectively. The overall rate of industrial growth during April 1985—February 1986 would have been higher but for decleration in electricity and mining sectors and certain other factors such as in frastructural and raw material constraints, under-utilisation of capacities, adverse industrial relations, inadequate technological upgradation, etc. Government have been taking several measures to stimulate industrial production through appropriate changes in industrial licensing and impact policies as well as through monetary and fiscal measures and improvement in infrastructure.
